## Acknowledgments

## List of Figures and Tables

1. **Introduction**                               | 17  
   1. Study background                           | 17  
2. Balance between theory, research, and policy | 20  
3. Aim of the research: key questions and constructs | 22  
4. Outline of chapters                          | 23  

2. **Previous research on risk factors of problematic youth group involvement** | 25  
   1. Introduction                               | 25  
   2. The importance to study early adolescence  | 25  
   3. Risk factors for problematic youth group involvement and offending | 26  
   4. Classification of the risk factors in the present study  | 27  
   5. Sex and ethnicity as risk factors          | 33  

3. **Origins of the integrative conditions-controls-exposure model** | 37  
   1. Introduction                               | 37  
   2. Some notes on theoretical integration      | 37  
   3. From social disorganization to collective efficacy and from neighborhoods to micro-places | 40  
   3.1 Shaw and McKay and the theory of neighborhood disorganization | 40  
   3.2 Frederick M. Thrasher and gangland        | 41  
   3.3 Criticisms of the original model of neighborhood disorganization | 42  
   3.4 Collective Efficacy Theory                | 44  
   3.5 Problems in neighborhood contextual research | 45  
   4. From subjective alienation theory to locus of control theory | 49  
   4.1 Alienation theory                         | 49  
   4.2 Locus of control theory                   | 50  

4.3 Locus of control in Mirowsky and Ross’
conditions-cognitions-emotions model 52
4.4 The importance of alienation for theories of problematic
youth group involvement 52
5 Social bonding theories 53
6 Social (cognitive) learning theory 55
6.1 Some problems of cause and effect in social learning theories 57
6.2 The problem of tautology 57
6.3 The narrow vision of human nature in social learning theories 58
7 Self-control theory and its evolution 58
7.1 The concept of low self-control in Gottfredson
and Hirschi’s theory 58
7.2 The reformulation of the general theory of crime 59
7.3 Some criticisms 60
8 The lifestyle/exposure model of offending 61
9 Situational action theory and the explanation
of problematic youth group participation? 63
10 Conclusion 67

4 Problematic youth group involvement
as situated action: a meta-theoretical framework 69
1 Introduction 69
2 Why would we need an analytical meta-theoretical framework? 71
2.1 A scientific realist perspective on problematic youth group
involvement 72
2.2 Explanation 75
2.3 Dissection and abstraction 75
2.4 Precision and clarity 76
2.5 The principle of complex parsimony 76
2.6 Action, its causes, and the causes of the causes 76
2.7 Mechanisms: the heart of the causal nexus 77
3 An emergentist systemist approach of problematic youth group
participation 80
4 A short note on human nature and social order in emergentist
systemism 82
5 Do we need general theories or theories of the middle range
to explain offending and problematic youth group involvement? 83
6 Conclusion 87

5 An integrative micro-place conditions-controls-exposure model of
problematic youth group involvement 89
1 Introduction 89
2 The integrative micro-place conditions-controls-exposure model 90
2.1 The role of micro-setting differential social organization 93
2.2 The role of control orientation 93
2.3 The role of low social integration as differential social support/control 94
2.4 The role of low moral beliefs 94
2.5 The role of the ability to exercise self-control 96
2.6 The role of lifestyle risk or criminogenic exposure 98

6 A multi-method approach in the city of Antwerp 99
1 Introduction 99
2 The Antwerp youth survey 100
3 Community expert survey of key informants to measure collective efficacy and disorder 101
4 Administrative census tract level data and police register data 102
5 Aggregation of census data to the neighborhood cluster level 103
6 Basic socio-demographic statistics and the relative stability of neighborhood disadvantage and disorder 104
7 Definition of problematic youth group involvement 106
8 Previous studies on the social ecology of crime and delinquency in Antwerp 108

7 Crime patterns of problematic youth groups 111
1 Introduction and goals 111
2 Self-reported delinquency per item and by gender and immigrant background 111
3 Offending by problematic youth group participation 112
4 Age of onset and problematic youth group participation 113
5 Prevalence of offending by problematic youth group participation 114
6 Conclusion 116

8 Family social position and problematic youth group involvement 117
1 Introduction 117
2 Family social position 117
2.1 Family structure 118
2.2 Family structural risk 119
3 Perceived relative deprivation and PYG involvement 121
4 Immigrant background versus Belgian native background 121
5 Repeating a class, disadvantage, and problematic youth group involvement 124
6 Multiple regression analyses of problematic youth group involvement by family structural background characteristics 126
9 The community context of problematic youth group involvement 129
1 Introduction 129
2 The ecological distribution of problematic youth group involvement 130
3 The mediating role of disorganizational processes 131
4 Context or composition? 132
5 Neighborhood cluster versus street-level indicators of neighborhood characteristics 134
5.1 Neighborhood cluster cumulative risk score 134
5.2 Observations of collective efficacy and disorder 135
5.3 Problematic youth group involvement and street segment conditions (youths’ observations) 137
5.4 Street segment cumulative risk score 139
6 Multiple logistic regression analyses of PYG on objective and subjective measures of community disadvantage 141

10 Individual characteristics and problematic youth group involvement 143
1 Introduction 143
2 Social bonds and problematic youth group involvement 143
2.1 Family social bonds 144
2.2 Parental monitoring 144
2.3 School social bond 144
2.4 Class integration 145
2.5 Social bonds risk score 146
3 Cognitions and individual traits 146
3.1 Control orientation 148
3.2 Low moral beliefs 148
3.3 Poor ability to exercise self-control 149
3.4 Propensity to offend as overall construct 149
4 Exploring the interactions between control orientation and individual characteristics 151

11 Situational exposure and problematic youth group involvement 157
1 Introduction 157
2 Unstructured routines 157
3 Peer delinquency 158
4 Substance use 159
5 The overall lifestyle risk score 160
6 Exploring the interactions between situational mechanisms 161
7 Exploring the interactions between propensity and exposure 163
